

SOC NEXUS | Enterprise Security Incident Report

CRITICAL SECURITY INCIDENT

1. Incident Overview

Incident ID	INC-003
Severity	CRITICAL
Status	CONTAINED
Detection Source	SOC NEXUS AI Correlation + Rule Engine
Source IP	192.168.1.21
Target Asset	192.168.1.17
Affected Account	socdemo
Generated At	2026-06-14T09:21:21
Report Hash	a05650c134db4c3f

2. Executive Summary

SOC NEXUS detected SSH brute force activity from 192.168.1.21 against 192.168.1.17. The activity included 18 failed authentication attempts followed by successful login activity. After the monitoring quiet window completed with no additional activity, the incident was automatically marked as contained.

3. Affected Assets

Target System	192.168.1.17
Observed Service	SSH / TCP 22
Attacker Source	192.168.1.21
Impacted Account	socdemo

4. Attack Timeline

Time	Source	Event	Severity
2026-06-14T09:17:51	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:17:56	192.168.1.21	Failed SSH logins escalating — 12 attempts	HIGH
2026-06-14T09:18:01	192.168.1.21	Failed SSH logins escalating — 13 attempts	HIGH
2026-06-14T09:18:04	192.168.1.21	Failed SSH logins escalating — 14 attempts	HIGH
2026-06-14T09:18:06	192.168.1.21	Successful SSH login after brute-force activity	CRITICAL
2026-06-14T09:20:27	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:20:32	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:20:35	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:20:40	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:20:45	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:20:49	192.168.1.21	Failed SSH logins escalating — 10 attempts	HIGH
2026-06-14T09:20:52	192.168.1.21	Failed SSH logins escalating — 10 attempts	HIGH

2026-06-14T09:20:55	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:20:58	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:21:03	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:21:07	192.168.1.21	Failed SSH logins escalating — 11 attempts	HIGH
2026-06-14T09:21:11	192.168.1.21	Failed SSH logins escalating — 12 attempts	HIGH
2026-06-14T09:21:15	192.168.1.21	Failed SSH logins escalating — 13 attempts	HIGH
2026-06-14T09:21:20	192.168.1.21	Failed SSH logins escalating — 14 attempts	HIGH
2026-06-14T09:21:21	192.168.1.21	Successful SSH login after brute-force activity	CRITICAL

SOC NEXUS | Enterprise Security Incident Report

5. Detection Details

The incident was detected through threshold-based SSH authentication monitoring and AI-assisted correlation. Repeated failed login attempts from the same source exceeded the normal baseline and were correlated into a single SOC incident.

6. Threat Analysis

Attack Type	SSH Brute Force / Credential Attack
MITRE ATT&CK	T1110 Brute Force, T1078 Valid Accounts
Observed Behavior	Repeated password guessing against SSH
Confidence	High

7. Response Actions

The platform generated real-time alerts, preserved authentication evidence, updated incident state, correlated related events, and produced this report automatically after the attack activity stopped.

8. Impact Assessment

Confidentiality	Low to Medium
Integrity	Low
Availability	Low
Business Impact	Limited impact in lab environment

9. Analyst Conclusion

Incident INC-003 represents a confirmed SSH brute force attempt from 192.168.1.21. The incident was detected, analyzed, documented, and contained automatically by SOC NEXUS. No additional activity was observed after the quiet window. Final status: CONTAINED.
